Viewing / Editing the new TBX-Min File

If you want to view the contents of your TBX-Min file in a user friendly way, and be able to edit the data, you may use the viewer found at http://viewer.tbxinfo.net/:

TBX Terminology Manager: Login

The online TBX terminology manager allows a user to view and edit TBX files dynamically. To get started, select one of the three options below.

Privacy disclaimer: This web page is experimental and all submitted data is collected for analysis. No personal identifiers are collected, but confidential data should not be submitted to this site. Users who do not wish to expose their data to the broader public should create a user account and log in, but staff may examine submitted data for diagnostic and developmental purposes. If you do not agree to these terms, please do not use this site.

Sign in:

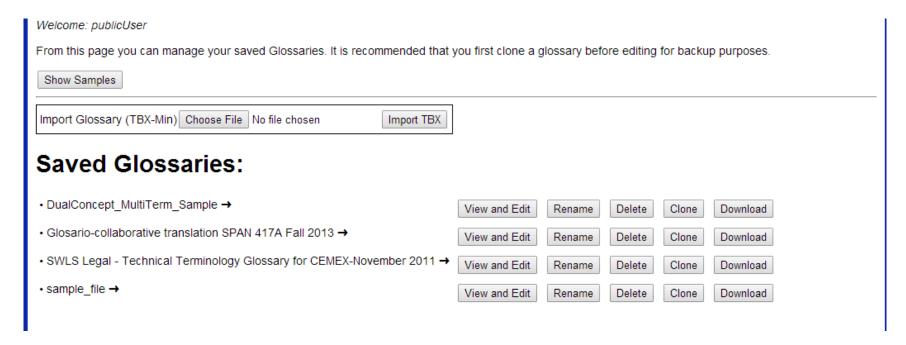

Registered Users	Register for an account	Public access (does not require a user accont)
User Name:	First Name:	Note: All glossaries built while logged in as the
Password:	User Name:	public user are visible to the public.
Sign In	Password:	Use public user: Sign In
	Confirm Password:	
	Create User	

Step 1)

You may register your own account or use the public Access account (Note that anything uploaded on this account is available to any user).

Step 2)

Once you have signed in, you will have the option to upload your TBX-Min file(s). All previously uploaded files will be shown here as well.

Clicking "Show Samples" will give you access to some previously validated sample TBX-Min files, should you ever wish to look at those. Simply upload the TBX-Min file you want to view and click "Import TBX". Once the import is complete your file will be listed in the "Saved Glossaries" section.

You have several options here:

- "View and Edit" This will take you to the manager, which allows you to view and edit TBX-Min
- "Rename" renames the file
- "Delete" delete the file
- "Clone" copy the file with a new name of your choosing (This is always recommended before editing TBX-Min files, to have a backup)
- "Download" download the TBX-Min file

Step 3)

If you plan to edit your TBX-Min file, you should clone it first for backup purposes. Click "Clone", then choose how many backups (clones) you want. We will just say "1". Now name your backup (the example was named to "SWLS - Backup"). Once this is done your management page should have your backup listed as well as the original:

Step 4)

We are now ready to safely look at our TBX-Min file. *Note: only tested to work on Mozilla Firefox and Google Chrome, does not yet work with Internet Explorer* Click "View and Edit" on the file you wish to look at. A new tab should come up as the viewer.

Step 5)

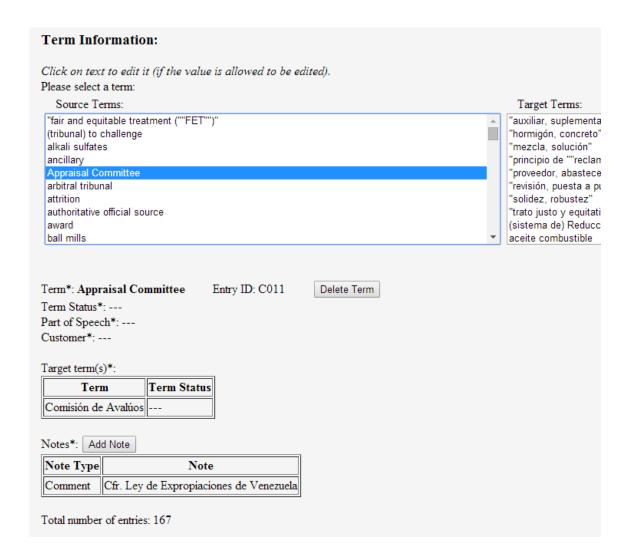

On the viewer screen you will see your Header Information (which you can edit by clicking on the existing values, or add values that don't exist by clicking "Add Header Info"

Upload: SWLS	Upload: SWLS Legal - Technical Terminology Glossary for CEMEX-November 2011					
id*: D001						
creator*: SV	VLS					
description*:	Technical Terminology Glossar for CEMEX, Nov 2011 (This is a test file)					
languages :	source: 'en' target: 'es'					
dateCreated*:	2014-08-11T23:55:03.941Z					
license*:						
directionality*:						

Deleting any value completely (making it completely blank) will delete it from the TBX-Min header. It may be added back at any time

Step 6)

Select a term from the lists under the "**Term Information**" section (either source or target). This will cause all of the related information to this term to display below:

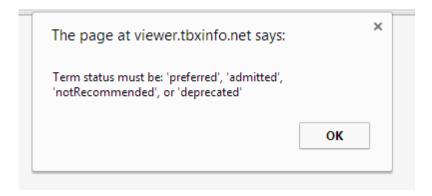

Step 7)

All values marked as "---" do not exist in your current TBX-Min file. These may be added or edited simply by clicking on them:

Term*: Appraisal Committee	Entry ID: C011		
Term Status*: prefer			
Part of Speech*:	art of Speech*:		
Customer*:			

Again, "Term Status" and "Part of Speech" can only have specific values in TBX-Min. These are enforced if you try to edit these values and a list of valid options will pop up if you type it incorrectly.

Step 8)

Terms may be completely deleted via the "Delete" button. They may be edited by click on them and typing. New comments may be added by clicking "Add Note" and filling in the appropriate values. "**Note Type**" is set to "Comment" by default, but can be any value you wish "Comment Author" perhaps? Soon, the ability to add terms will also be available.

Step 9)

When all changes look good you may either "Save", which saves your file and refreshes the page, or "Save and Download", which will save any changes made and will download the edited version of the TBX-Min file to your computer.
